### POSITION DESCRIPTION:

- Responsible for IT solution architecture and design incorporating engineering, operational, and customer specific requirements.
- Produce specifications to support the delivery of new business projects, business change requests, and customer change requests.
- Work closely with customers, IT teams, business development teams, engineering, and operational teams.
- Facilitate solution design workshops.
- Design practical, efficient, and cost-effective solutions, providing options with benefits, risks, and recommendations included when taking geography, time, budget, resource, customer constraints, volumes, skills, and available technologies into consideration.
- Facilitate and support on-site deployments through warranty periods.
- Review and approval of delivered software prior to promotion into production environments.
- Facilitate and support onsite deployments through warranty periods.

### QUALIFICATIONS:

- Bachelor's degree in Computer Science a related field, or relevant industry experience in an IT-related role within Logistics or Supply Chain.
- Proven track record in delivery of complex warehouse management, supply chain, and logistics solutions within a 3PL or commercial WMS environment.
- Excellent written and verbal communication. Ability to apply creativity and critical thinking to problem-solving solutions.
- Strong project management skills, with proven capability to deliver well-documented solutions within time, cost, and functionality restraints.
- Detailed knowledge of warehouse, transport, and duty management solutions and processes.
- Demonstrated ability to work with remote teams and customers across numerous geographies and time zones.
- Extensive experience with supply chain and logistics applications and processes.
- Good understanding of databases and schemas, with an ability to develop and interpret detailed and complex technical documentation.
- General knowledge of trends in technology relating to software applications and logistics.
- Detailed knowledge and understanding of Enterprise Integration solutions and messaging.
